

Important: If you are not a trained motorcycle mechanic, stop now! Ask a local motorcycle shop to do the work for you!

You have to install the crash pads one side and than the other!

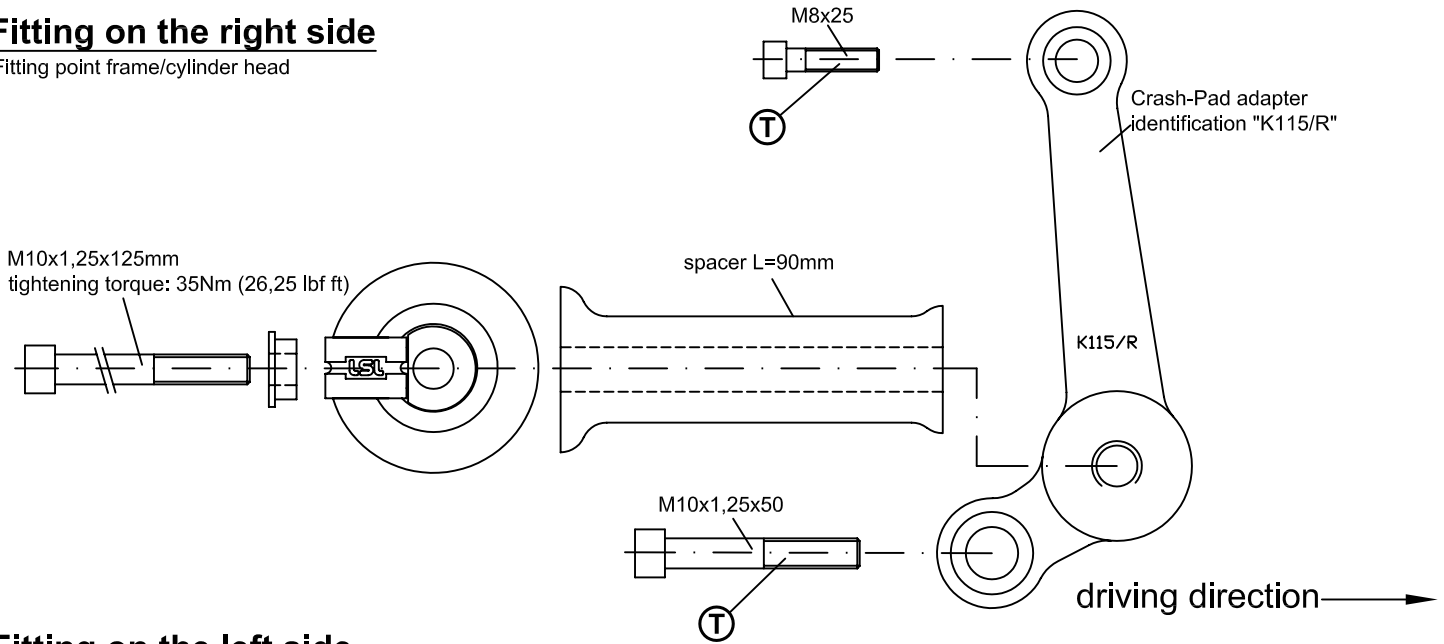

Thereby it is important not to loose more than one engine mounting bolt at the same time!

For all tightening torques of the engine bolts look at the work shop manual!

Use thread locking adhesive on screws marked with **(T)** !

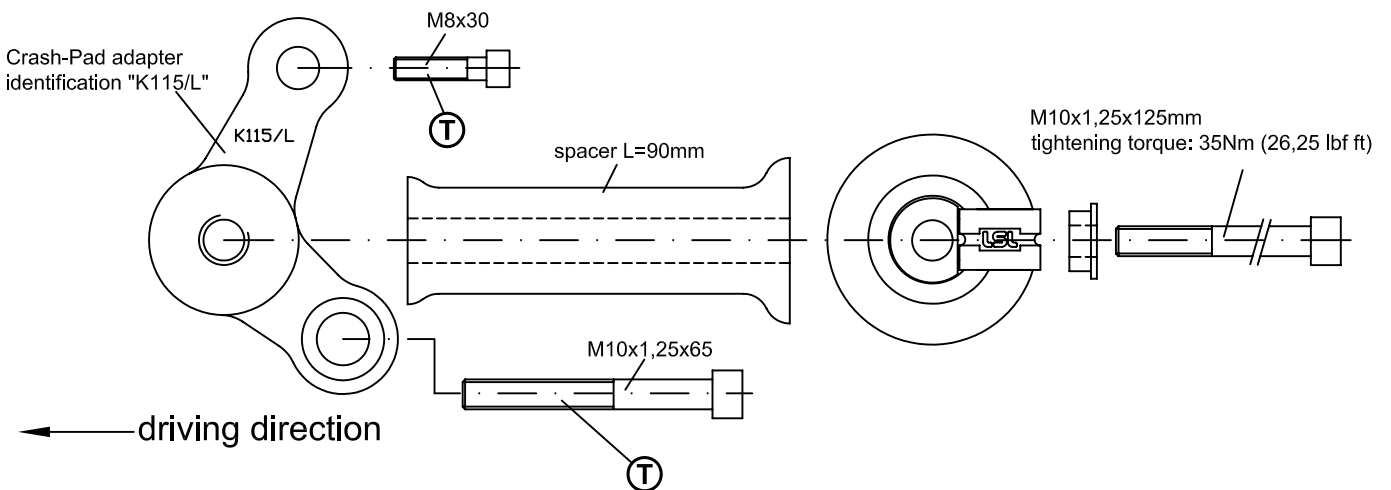

Fitting on the right side

Fitting point frame/cylinder head

Fitting on the left side

Fitting point frame/cylinder head
